

Safe

(No danger of harming living things)

A

Dangerous

Potentially harmful to living things

A

Produces electricity in all types of weather

B

Seasonal Or Weather Dependent

B

Clean

(Doesn't emit or produce Carbon Dioxide & Other Toxins)

C

Dirty

Produces greenhouses gases or toxic chemicals

C

Renewable
(Won't Run Out)

D

Nonrenewable

Takes millions of years to replace- Will run out

D

Can Work everywhere

E

Only works in some geographic locations

E

Already Developed

F

More Up-Front Cost to Develop

F

Cheaper & Easier to Maintain

G

More Break Down and Repair Cost

G

Reduces U.S. reliance on foreign energy

H

Must rely on other countries to get enough

H

Quiet

I

Produces Noise

I
